

C# -- Originally not supported

Using co-pilot (ask)

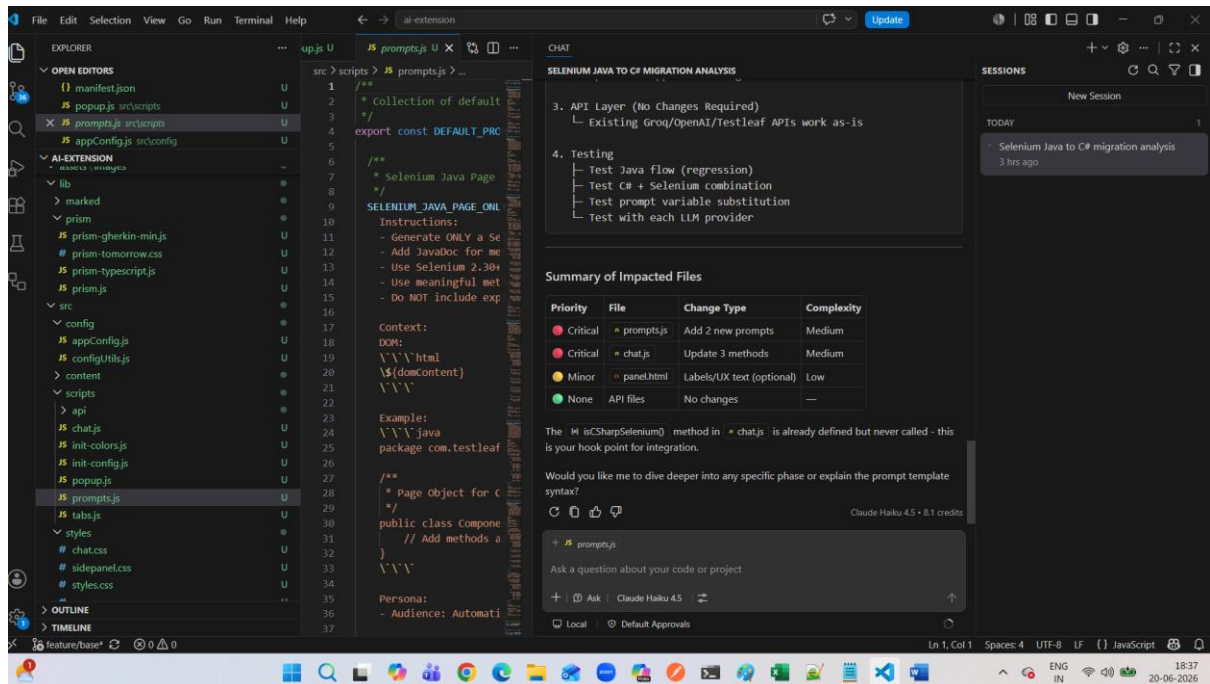

Instructions given :

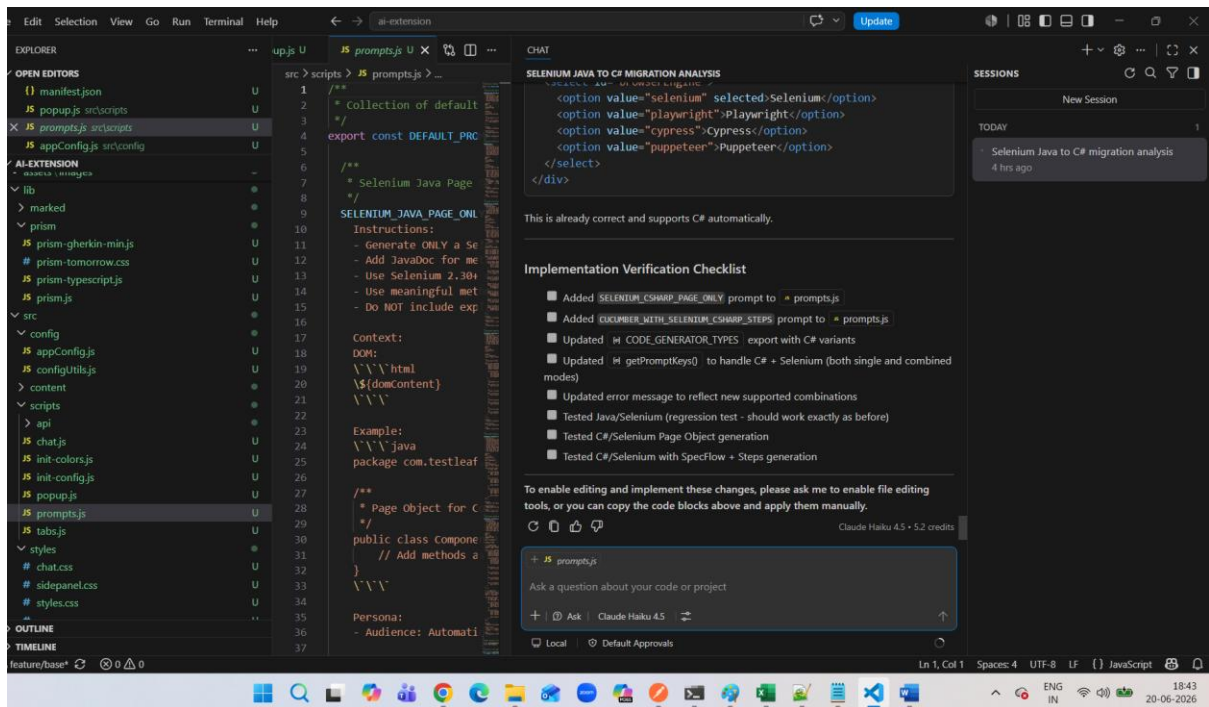

Analyse my entire code base and give the impacted code files for existing selenium Java implementation flow also the required architecture changes to implement

Instructions added :

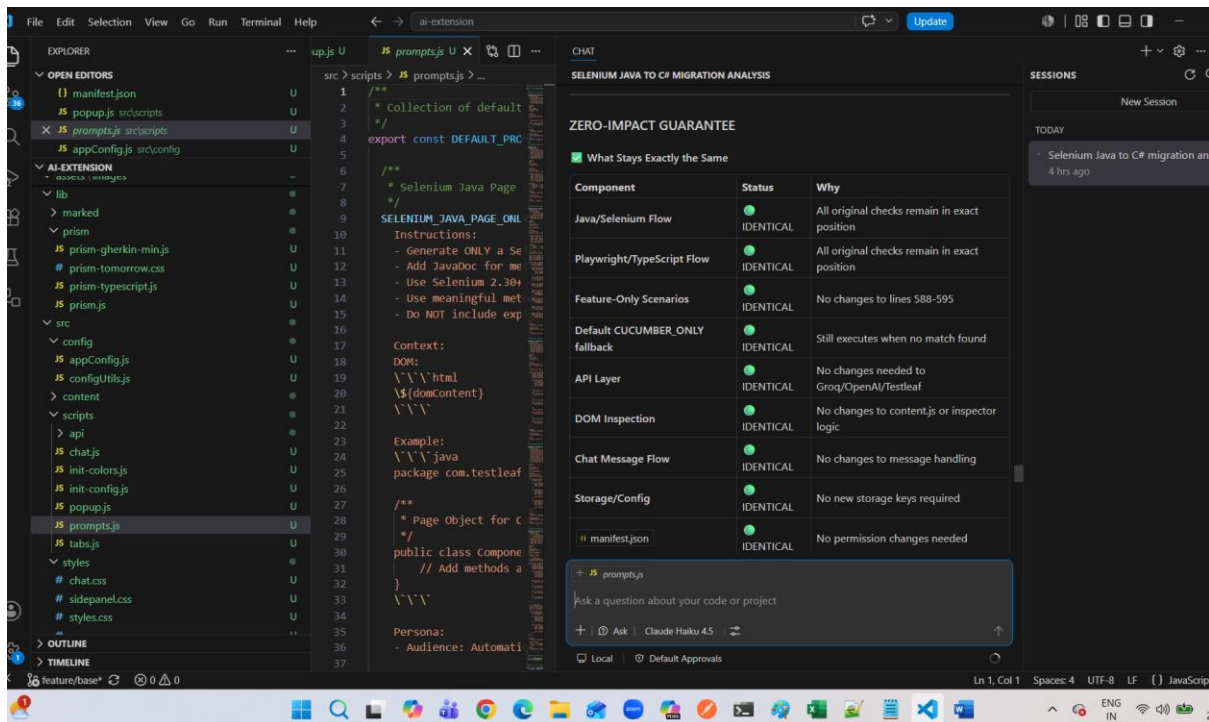

Existing supports selenium Java add new changes to support selenium C# , both selenium Java and selenium C# should be supported no impact in the existing functionality

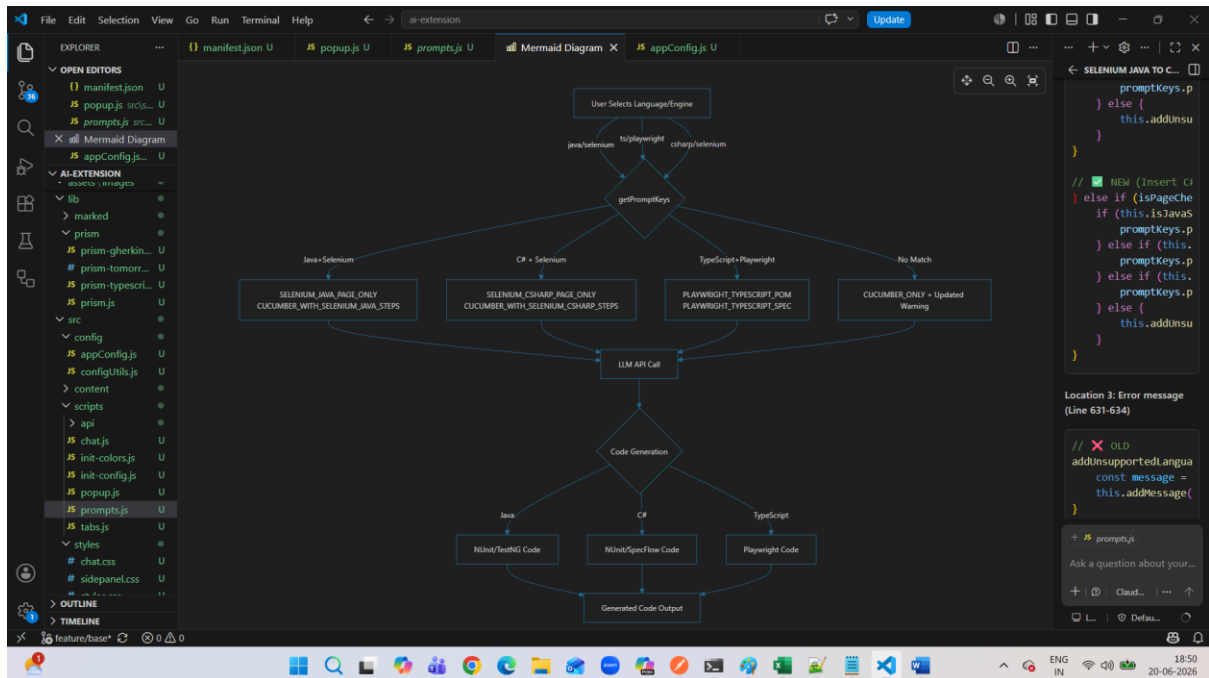

Again assuring no changes in playwright / type scripts code.

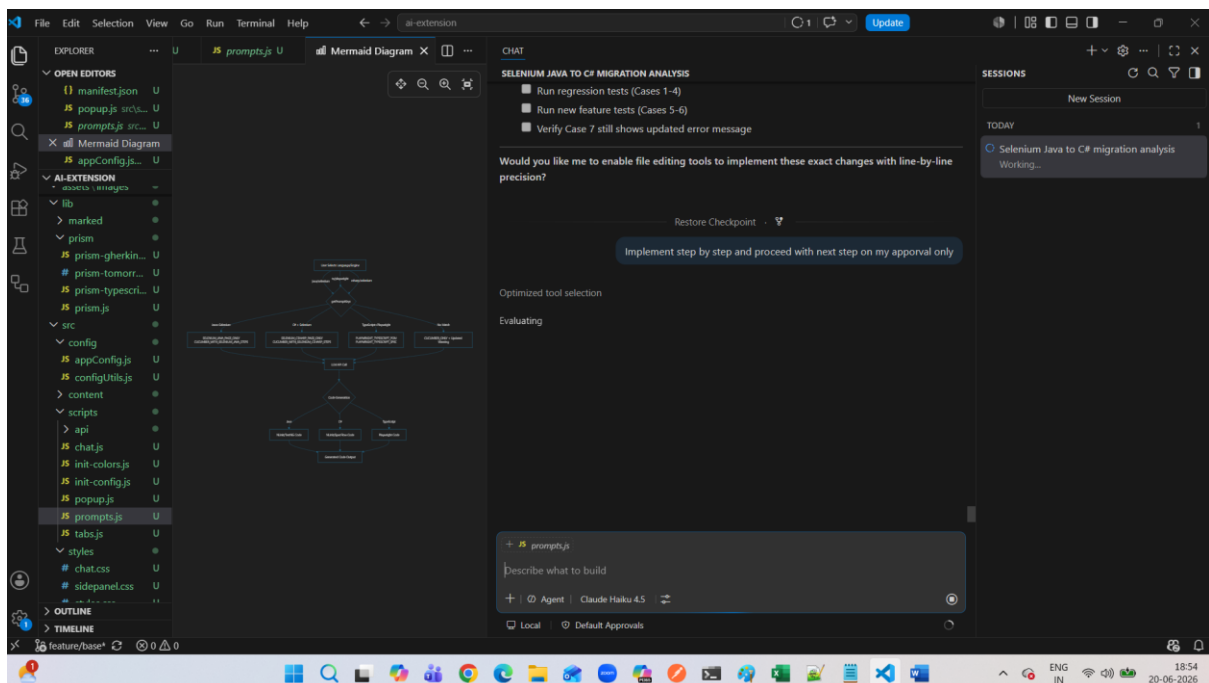

[IMPORTANT] make sure no changes in playwright and type scripts code also show me the architectural changes that will be done post this

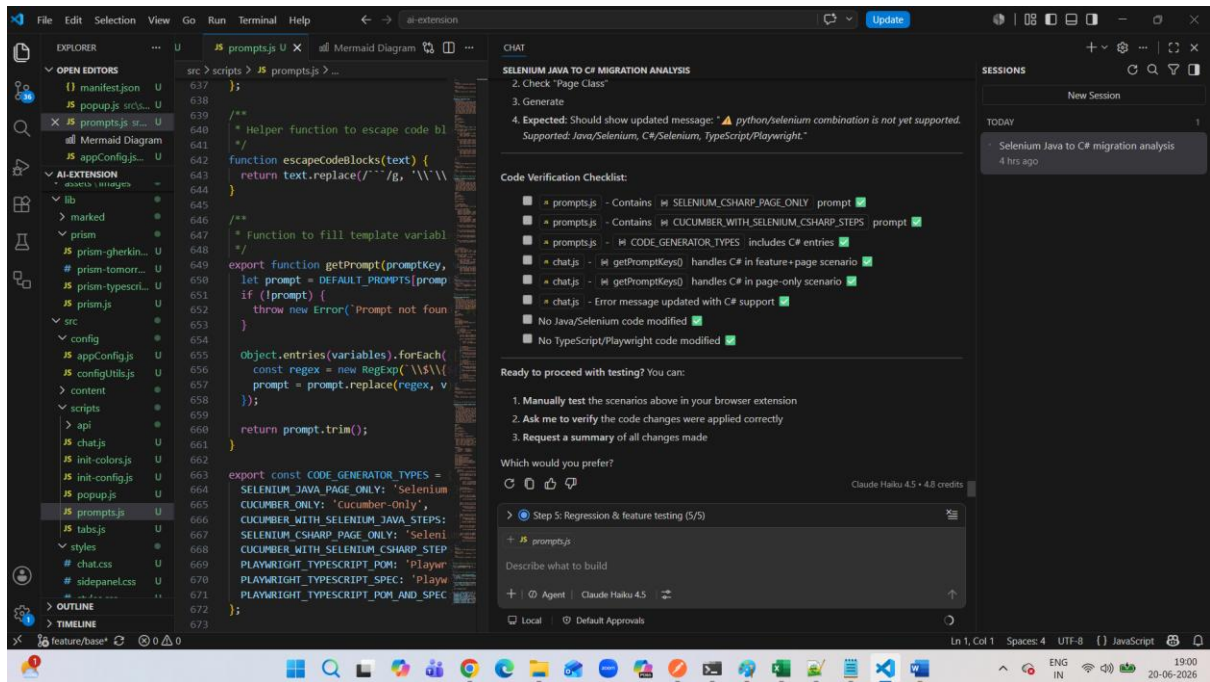

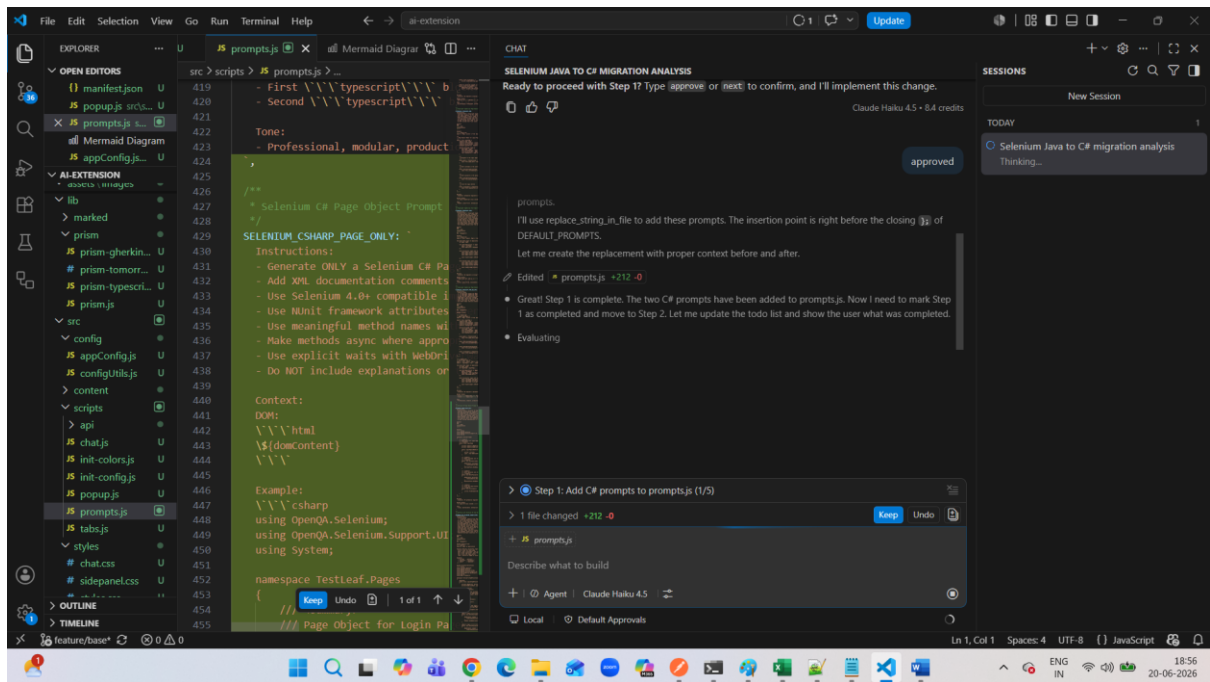

Asked to show Architectural changes after implementation

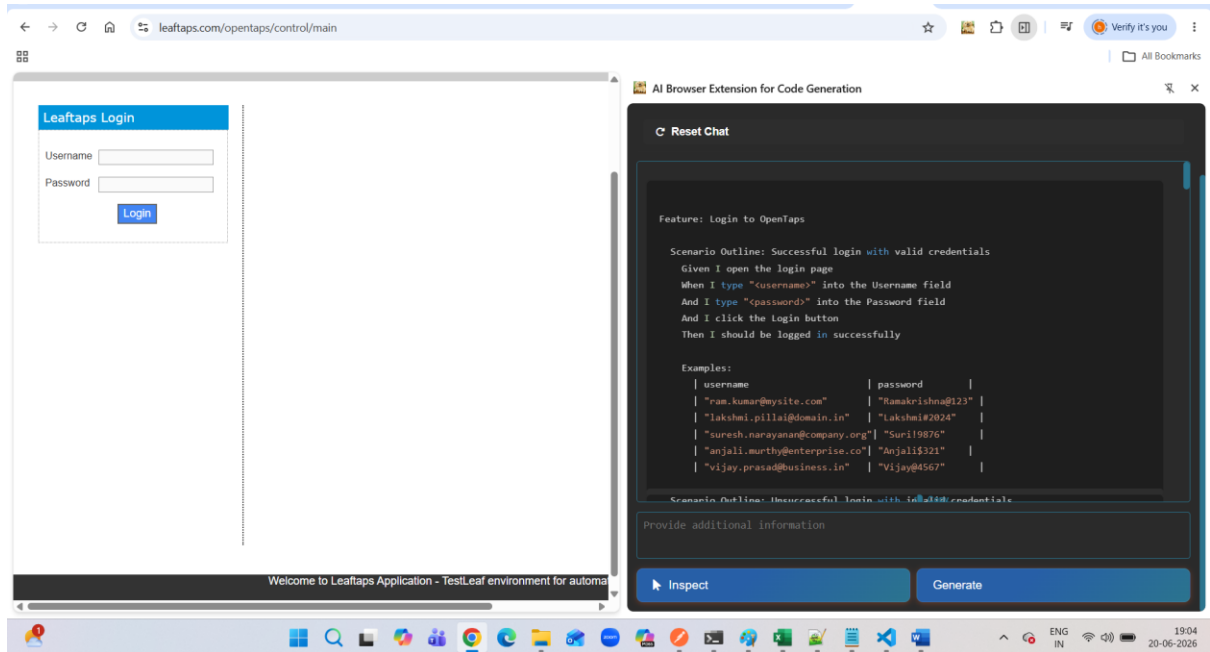

Asking agent to proceed
